KAMIL UCHWAT

ABOUT

Backend-focused Software Developer passionate about building efficient solutions with **Python** and **FastAPI**. I pride myself on strong technical fundamentals and the agility to adapt to new stacks rapidly. With a track record of developing practical applications, I am now seeking an opportunity to dive into complex projects, collaborate with senior experts, and deliver high-quality code in a professional team.

EXPERIENCE

CONTRACTOR FOR APTIV – 19.02-31.04.2025

(Project executed under the supervision of Rzeszów University of Technology)

- Developed a specialized **resource planning module** for Aptiv using the Bryntum library.
- Implemented complex scheduling interfaces using **TypeScript** and **Express.js**.
- Collaborated closely with university supervisors to deliver a solution meeting corporate standards.

E-BI.COM – INTERN C# .NET DEVELOPER 02.09-30.10.2024

- Designed and implemented secure **authentication APIs** from scratch using **C# .NET**.
- Engineered token management logic and user session handling to ensure system security.
- Gained practical experience in database architecture and secure project structuring

IDEA COMMERCE S.A – INTERNSHIP PYTHON DEVELOPER 19.02-19.03.2024

- Developed custom modules for the **Odoo ERP system** using **Python** and **XML**.
- Implemented functionality to link invoice notes directly to sales orders.
- Worked with **PostgreSQL** for data management and backend integration.

SKNI KOD – STUDENTS SCIENCE CLUB – 01.10.2022-04.02.2026

- Developed an AI-driven solution **for document analysis and sorting** during the HackING hackathon.
- Engineered a **real-time sign language recognition model**, focusing on computer vision and neural network optimization.
- Gained extensive hands-on experience in rapid prototyping and teamwork during competitive coding events.

tfx-systems.com - FOUNDER – 01.04.2025 - currently

- **Founded TFX Systems — an algorithmic trading signal platform (tfx-signals.com) covering 23 global markets (FX, gold, indices, energy, currency crosses).**
- **Sole developer of the full-stack SaaS: NestJS backend, Next.js 14 frontend, FastAPI signal service, and MT5 Python bridge for live trade execution.**

- **Implemented Stripe subscription billing, JWT / Google / Telegram OAuth, automated Telegram group access management, and real-time signal delivery pipeline.**

EDUCATION	M.Sc. in Computer Science Rzeszów University of Technology Feb 2026 – Present B.Eng. in Computer Science Rzeszów University of Technology Oct 2022 – Feb 2026 • GPA: 4.5/5.0 • Engineering Project: "Algorithmic Trading Bot" – recognized as an outstanding thesis. • Tech Stack: Python (FastAPI), TypeScript (Vue.js, Express.js)
-----------	--

SKILLS	Programming Languages: Python (Advanced), TypeScript, JavaScript, C# (.NET), SQL. Backend Development: FastAPI (Core), Express.js, RESTful APIs, Token Authentication (JWT). Frontend Development: Vue.js. AI & Machine Learning: Neural Networks, Computer Vision (Real-time Gesture Recognition), Document Classification, Data Preprocessing. Databases & Tools: PostgreSQL, Git, Linux. Software Engineering: Algorithmic Trading Systems, Resource Planning Modules, Project Structuring, Secure Session Management.
